

## Azure with Terraform from Scratch

We will start this meeting at 9:10pm.  
Everyone is requested to please maintain the decorum.

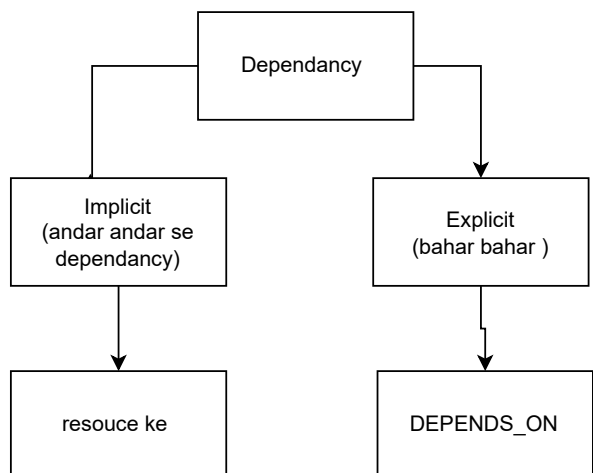

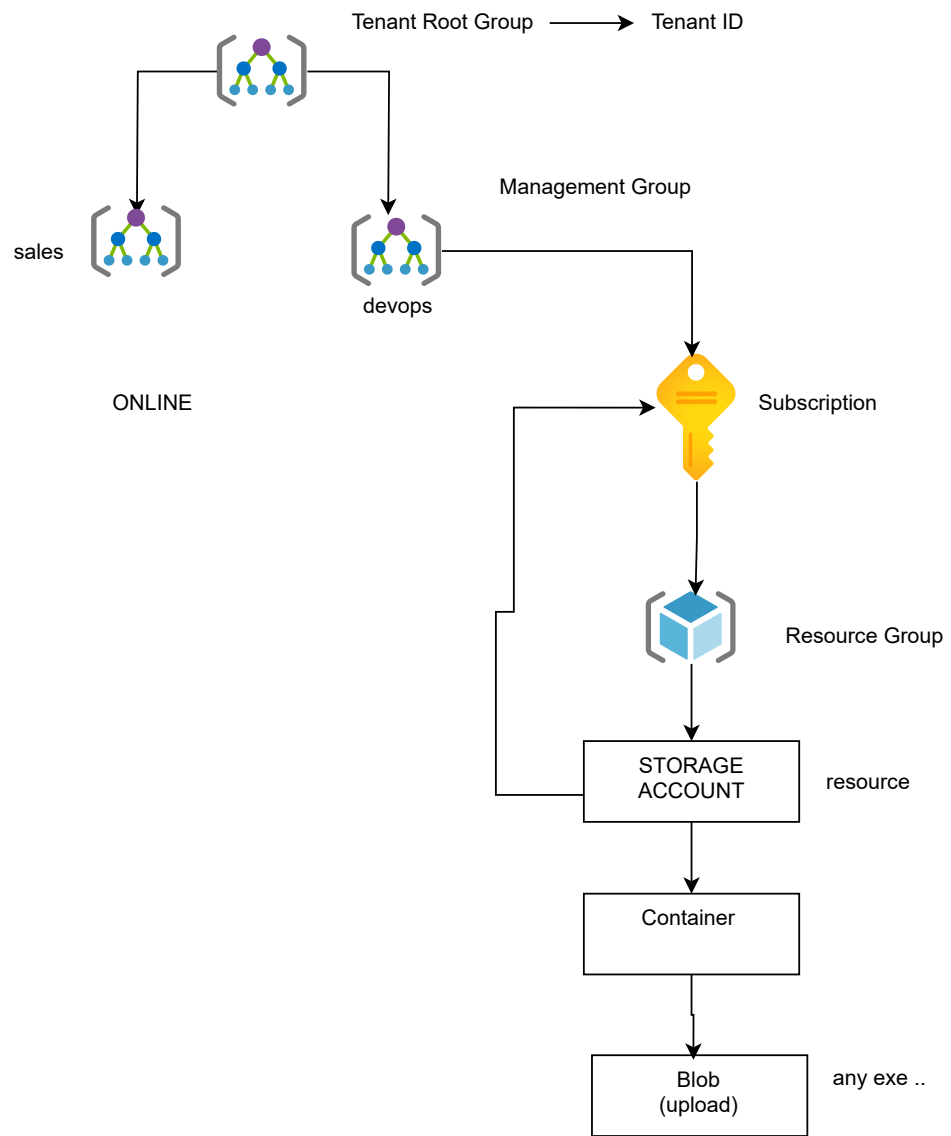

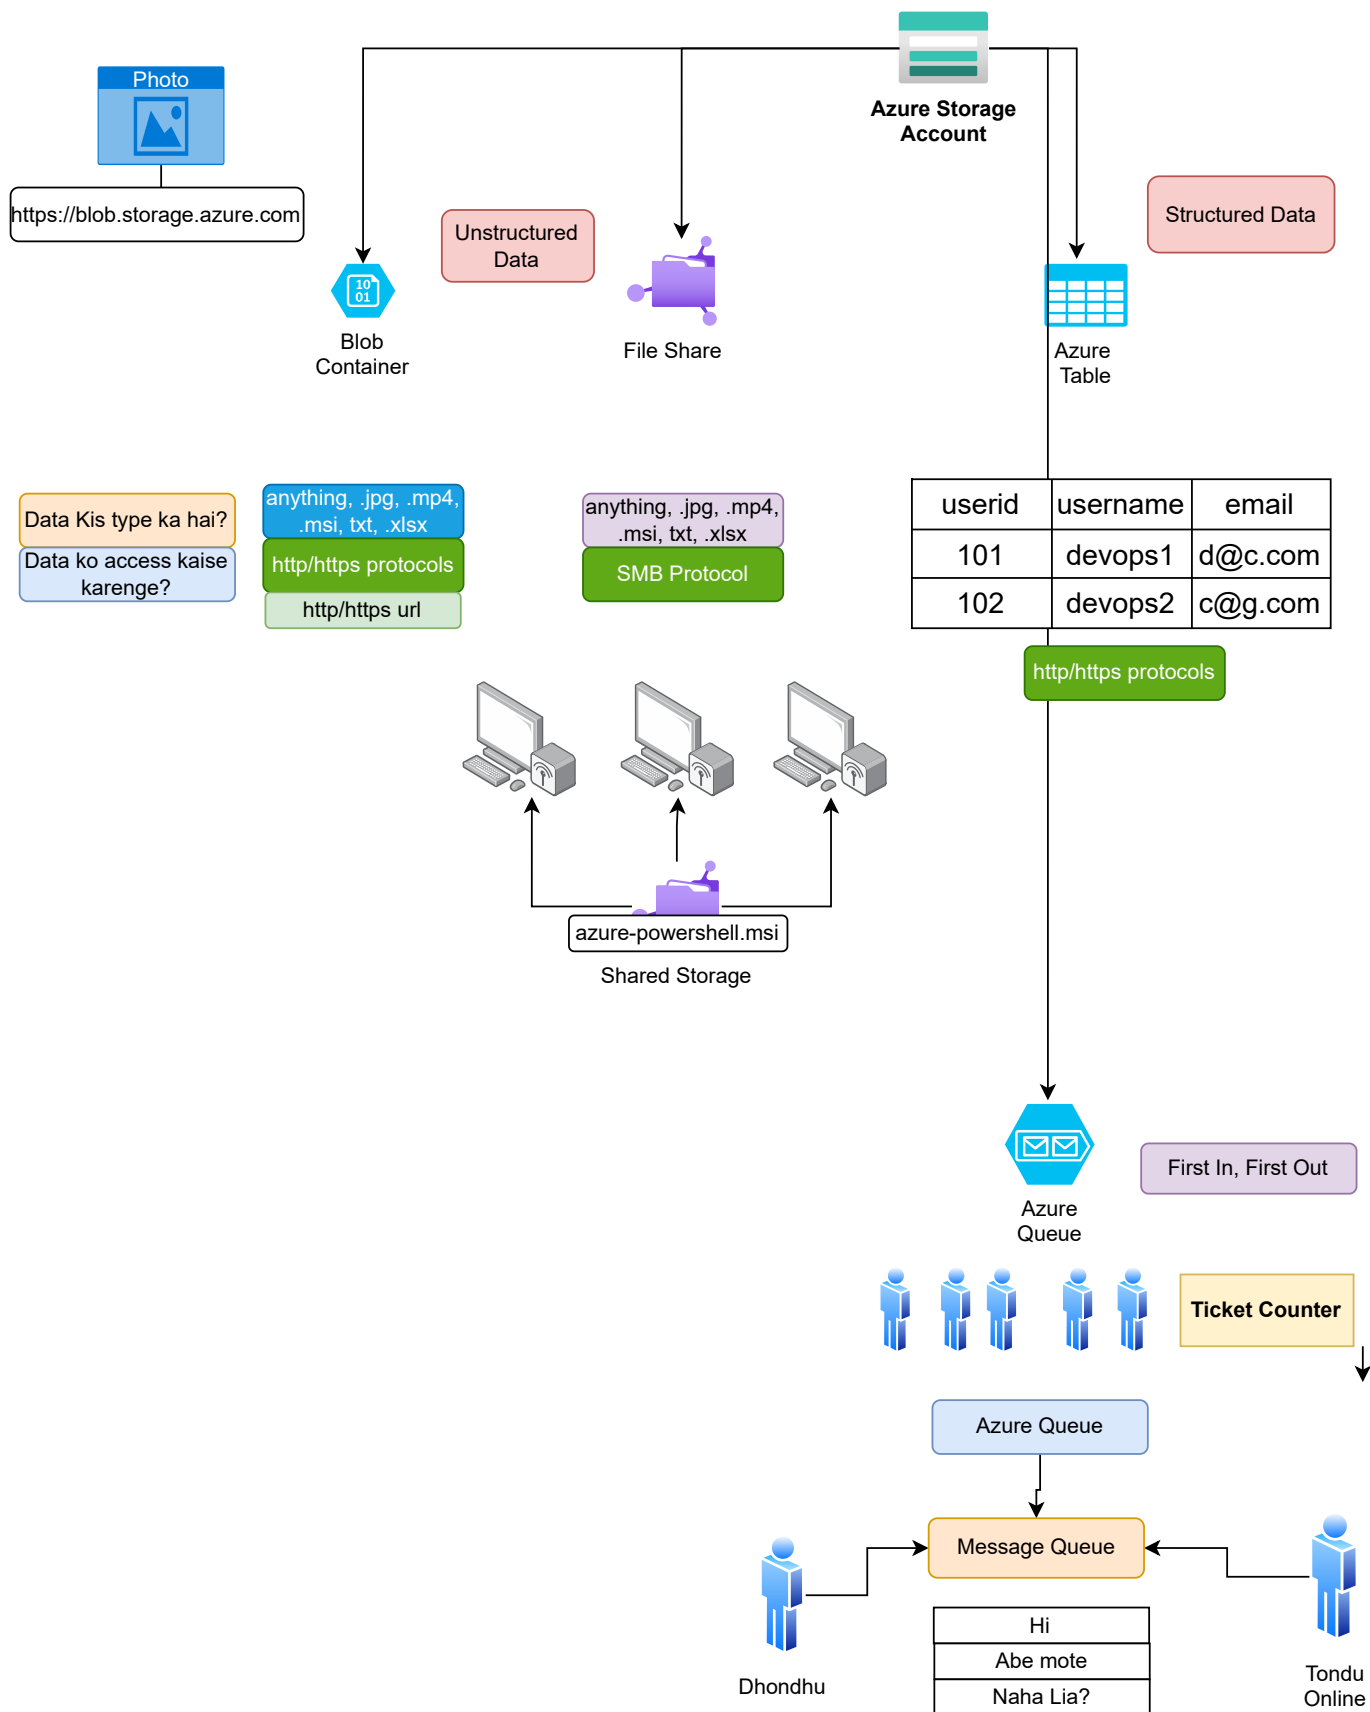

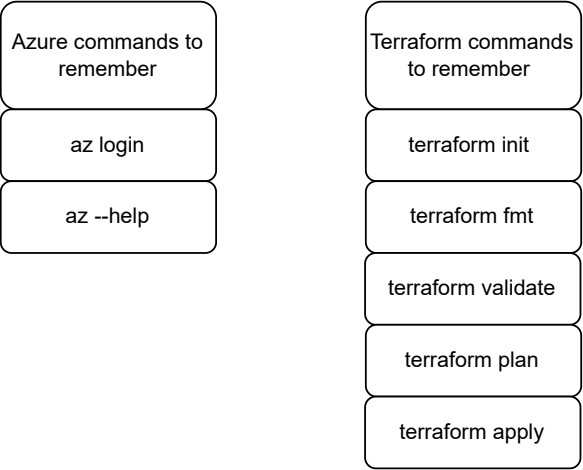

.EXE - file

Bna skta h azure me

Usage: terraform [global options] import [options] ADDR ID

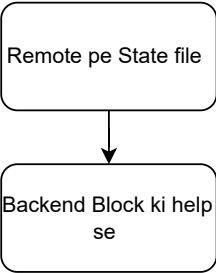

[ ] - optional  
small - compulsory  
CAPITAL - change hoga

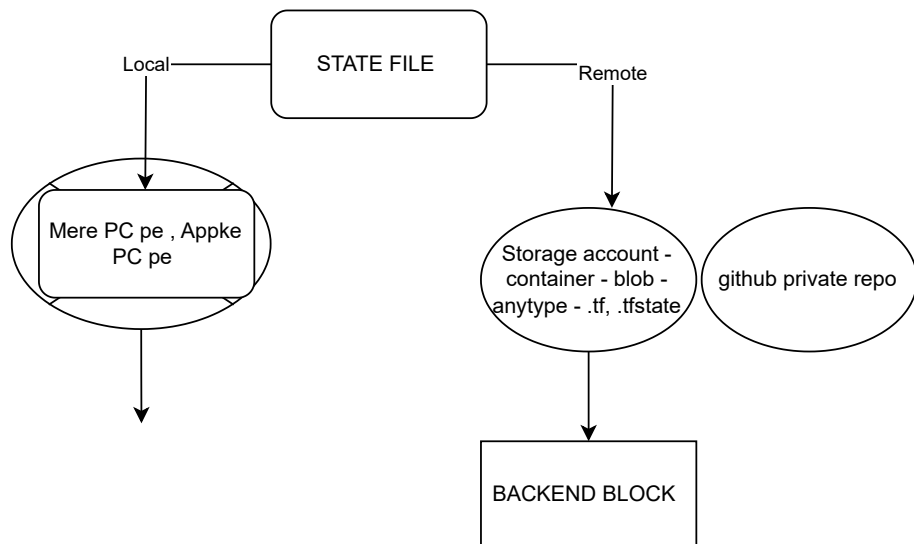

Usage: terraform import ADDR ID

Terraform import ADDR /subscriptions/fb1023fa-927d-4d73-950b-c4a2d62ed94f/resourceGroups/bhaviRG

Terraform import azure`rm_resource_group`.example1 /subscriptions/fb1023fa-927d-4d73-950b-c4a2d62ed94f/resourceGroups/bhaviRG

azure`rm_resource_group`.example1      `azurerm_resource_group.example1`

```
terraform {  
  backend "azurerm" {  
    resource_group_name = "bhaviRG"  
    storage_account_name = "bhavistg111"  
    container_name       = "tfstate"  
    key                  = "prod.terraform.tfstate"  
  }  
}
```
